## Why You Cant Get The Pfizer Comirnaty Shot In America

September 25, 2021

There is a huge real-world difference between the Pfizer product approved under EUA compared with those the FDA has fully licensed. EUA products are experimental under U.S. law. Both the Nuremberg Code and federal regulations provide that no one can force a human being to participate in this experiment. Under 21 U.S. Code Sec.360bbb-3(e)(1)(A)(ii)(III), “authorization for medical products for use in emergencies,” it is unlawful to deny someone a job or an education because they refuse to be an experimental subject. Instead, potential recipients have an absolute right to refuse EUA vaccines.

EUA-approved COVID vaccines have an extraordinary liability shield under the [2005 Public Readiness and Preparedness Act](#). Vaccine manufacturers, distributors, providers and government planners are immune from liability. The only way an injured party can sue is if he or she can prove willful misconduct, and if the U.S. government has also brought an enforcement action against the party for willful misconduct. No such lawsuit has ever succeeded.

At least for the moment, the Pfizer Comirnaty vaccine has no liability shield. Vials of the branded product, which say “Comirnaty” on the label, are subject to the same product liability laws as other U.S. products.

When the Centers for Disease Control and Prevention’s (CDC) Advisory Committee for Immunization Practices places a vaccine on the mandatory schedule, a childhood vaccine benefits from a generous retinue of liability protections. But licensed adult vaccines, including the new Comirnaty, do not enjoy any liability shield. Just as with Ford’s exploding Pinto, or Monsanto’s herbicide Roundup, people injured by the Comirnaty vaccine could potentially sue for damages. And because adults injured by the vaccine will be able to show that the manufacturer knew of the problems with the product, jury awards could be astronomical.

Pfizer is therefore unlikely to allow any American to take a Comirnaty vaccine until it can somehow arrange immunity for this product.

Given this background, the FDA’s acknowledgement in its approval letter that there are insufficient stocks of the licensed Comirnaty, but an abundant supply of the EUA Pfizer BioNTech jab, exposes the “approval” as a cynical scheme to encourage businesses and schools to impose illegal jab mandates.

Americans, told that the Pfizer COVID vaccine is now licensed, will understandably assume COVID vaccine mandates are lawful. But only EUA-authorized vaccines, for which no one has any real liability, will be available when many mandate deadlines occur.

And the FDA has not licensed any Moderna vaccine, nor any vaccine from Johnson & Johnson — so the vast majority, if not all, of vaccines available in the U.S. remain unlicensed EUA products.

Here’s what you need to know when somebody orders you to get the vaccine: Ask to see the vial. If it says “Comirnaty,” it’s a licensed product.

If it says “Pfizer-BioNTech,” it’s an experimental product, and under 21 U.S. Code 360bbb, you have the right to refuse. If it comes from Moderna or Johnson & Johnson (marketed as Janssen), you have the right to refuse.
